Lenntech designs ready-to-use containerized desalination plants that can produce up to 1000 m³/day of drinking water from different sources and with varying salinities.

This 50kW solar power system is ideal for off-grid communities that rely on renewable energy for essential services, such as water pumps, health clinics, schools, and residential lighting.

This review will serve as a guidebook for researchers and policy makers to identify and select suitable configuration of photovoltaic-water related technologies for implementation ...

From portable units to large-scale structures, these self-contained systems offer customizable solutions for generating and storing ...

From portable units to large-scale structures, these self-contained systems offer customizable solutions for generating and storing solar power. In this guide, we'll explore the ...

In this review, the new solar water treatment technologies, including solar water desalination in two direct and indirect methods, are comprehensively presented.

Pure Aqua produces an assortment of containerized and mobile water treatment solutions that are custom-built to fit any application.

ManAqua is our solar-powered desalination solution, designed as a low-cost solution for running water. Facilitating the ease of access to clean water, especially in many ...

This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or ...

A water treatment plant in container is a complete solution, assembled and tested off-site at our factory. The solution is complete with all internal ...
