Learn how terminals are embracing renewable energy, highlighting solar, wind, electrification & grid resilience with LBCT.

"By working hand-in-hand with PNCT and the city of Newark, our seaport is now home to a large solar energy project capable of generating significant energy for one of its ...

The Port Authority of New York and New Jersey and Port Newark Container Terminals (PNCT), marked a milestone with the ...

At the Port Newark Container Terminal in New Jersey, solar panels have been shoehorned into a tightly packed, high-traffic shipping facility, without disrupting operations or ...

The Port Authority of New York and New Jersey and Port Newark Container Terminals (PNCT), marked a milestone with the completion of one of the largest solar power ...

Employee parking lots offer additional space for solar generation facilities. Canopy structures topped with PV panels not only enhance parking by keeping the cars cooler during sunny ...

Designed to maximise energy generation in a space-limited setting, the installation includes five canopy arrays positioned above active truck lanes, generating 3.8 megawatts, ...

Rockville, Md. - July 8, 2025 - Standard Solar and Port Newark Container Terminal (PNCT) have completed a 7.2 megawatt (MW) solar project engineered to integrate with the operational ...

Standard Solar installed the project, which is made of rooftop installations and solar canopy systems to avoid taking up ground space in the bustling port. The project provides ...

Discover how Higher Wire shipping container solar systems provide reliable, off-grid power for remote worksites and projects.
