**What is a Wattum mining container?**

For everyone. Wattum Mining Containers are mobile solutions that allow miners to operate without a building to host machines in. Containers can be deployed near an energy provider of your choice, potentially allowing for higher profit margins compared to stationary facilities that are dependent on their local power grid.

**How many ASIC units can a Wattum mining container hold?**

The Wattum mining container can hold up to 324 ASIC units, with a 3.5 kWh capacity each. That means you can plug and play: 324 Innosilicon. Can I purchase mining equipment with a mining container? Yes. Wattum also offers Container Bundles that make it easier to get your mobile operation up and running.

**What is the Wattum crypto mining container?**

Our most efficient and flexible mining solution yet. The Wattum crypto mining container is a purpose-built mining solution that provides increased mobility and efficiency and reduces overall operational costs. It can hold up to 324 ASICs and can be easily deployed in areas with abundant energy and low electricity rates.

**What is a plug-and-play hydro container?**

Equipped with advanced hydro cooling systems, these containers are built to support intensive mining operations while significantly reducing heat, noise, and power consumption. Whether you're scaling your mining farm or starting a new project, our plug-and-play hydro containers provide a cost-effective and sustainable solution.

The mobile mining container allows you to scale and transport easily, with the capacity to host a mining farm of any size. It provides you with a high ...

The mobile mining container allows you to scale and transport easily, with the capacity to host a mining farm of any size. It provides you with a high flexibility to ship or transport your crypto ...

Our solution focuses on relocatable PV systems, enabling seamless redeployment to new sites with minimal investment. This extends asset lifespan and maximizes economic returns across ...

With an experienced R&D team, we are able to design and manufacture solar power pods with superior performance and cost-effectiveness according to the specific needs of our customers. ...

The Wattum crypto mining container is a purpose-built mining solution that provides increased mobility and

efficiency and reduces overall operational costs. It can hold up to 324 ASICs and ...

The Wattum crypto mining container is a purpose-built mining solution that provides increased mobility and efficiency and reduces overall operational ...

Fold & Go PV containers provide resilient, space-efficient solar energy for remote operations, disaster response, and off-grid applications. Learn how our 1MW Guinea mine ...

Equipped with advanced hydro cooling systems, these containers are built to support intensive mining operations while significantly reducing heat, noise, and power consumption.

The mobile solar containers and portable solar chargers are designed with easily foldable solar panels which makes them ideal for remote areas and versatile applications like mining, ...

A crypto mining shipping container is a modified steel container built to house high-powered mining hardware. These mobile mining farms are designed to provide proper airflow, cooling, ...
