On April 30, 2022 Armenia's first community-owned solar PV plant with 600 kW AC capacity (713 kW DC) was connected to the national grid in Artik, Shirak Province.

Discover our solar container power solutions offering reliable, modular, and off-grid renewable energy. Ideal for remote sites, disaster recovery, and industrial applications.

In this assessment, we delve into the key infrastructural elements for anyone considering a solar module production plant in Armenia. We explore transportation ...

In this assessment, we delve into the key infrastructural elements for anyone considering a solar module production plant in ...

As Armenia positions itself as a regional energy hub, its energy storage advancements offer valuable lessons in balancing technological innovation with sustainable development.

If in 2021 the share of solar energy in the total volume of electricity production in Armenia was 1.2%, then in 2024 it will be ten times more - 11.9%. This remarkable growth ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

The biggest solar water-heater in Armenia is located at Diana hotel in Goris, which has 1900 vacuum tubes that provide hot water for a swimming pool with 180 cubic meter volume, and for ...

At Solarvance, we offer climate-adapted, snow-resilient, and high-efficiency solar systems for Armenia's diverse environments. Whether powering a guesthouse in Dilijan, a greenhouse in ...

With a growing focus on solar energy storage solutions, local companies are bridging the gap between intermittent solar supply and 24/7 energy demand. This article explores Armenia's ...
