How do I install a solar panel?

Here's a general overview of the solar panel installation process: 1. Site Assessment and Design: Assess the site for sunlight exposure, shading, and roof orientation. Design the system layout, including panel placement, wiring routes, and inverter location. 2. Mounting the Racking System: Install the racking system on the roof or ground.

How do you install solar panels on a racking system?

Attach the solar panel mounts to the racking system, leaving enough space for airflow under the panels. 3. Installing Solar Panels: Place the solar panels on the mounts and secure them using bolts and clamps. Connect the panels in series or parallel, depending on the system design. 4. Wiring the System:

What are the components of a solar panel system?
