What is a solar lighting system for home?

A solar lighting system for home is exactly what it sounds like: a setup that uses solar energy to power your lights. It can be fully off-grid or work alongside your existing grid power. At its core, the system includes:
Solar panel: Captures sunlight and converts it into electricity. Battery: Stores the energy for use when the sun isn't shining.

How does a solar lighting system work?

Indoor systems: Solar-powered bulbs or kits that light up rooms, often with a panel outside and lights inside. Here's a simple way to visualize it: sunlight hits the panel, the panel charges the battery, and the battery powers your lights. No grid needed! **Why Use a Solar Lighting System at Home?**

How do you plan a solar lighting system?

Here's how to map out your solar lighting system for home: Outdoor: Gardens, pathways, patios, or security spots. Indoor: Living rooms, kitchens, hallways, or emergency-only areas. List the lights you want and their wattage (e.g., 5W LED bulb). Multiply by hours of use per day to get daily watt-hours (Wh). Example:
