What is Azerbaijan's potential for small hydropower?

Although hydropower is Azerbaijan's largest source of renewable energy today, its potential has not been fully exploited. According to the Ministry of Energy, the country's technical potential for small hydro is 520 MW, which could generate up to 3.2 TWh annually.

Is Azerbaijan embracing natural gas as a transition fuel?

As COP29 host, Azerbaijan is embracing natural gas as a transition fuel while laying the groundwork for a low-carbon future, he says. In this episode, we look at Azerbaijan's 8 November Power Plant, the South Caucasus's largest gas facility. With hydrogen-ready technology, it's a major step in the country's energy transition.

What is Azerbaijan's most advanced power plant?

In this episode of Energy Frontiers, we examine Azerbaijan's most advanced power facility to date--the 8 November Power Plant. Located in Mingachevir, the country's energy hub, the high-efficiency, combined-cycle gas plant is set to generate 1,880 megawatts of electricity while reducing emissions by 50%.

How can Azerbaijan improve energy security?

Diversifying and improving the energy capacity of the country to ensure energy security. Azerbaijan has significant untapped renewable energy potential, as it is a relatively sunny and windy country, and it also has sizeable hydro, biomass and geothermal resources.

These reforms can be seamlessly integrated with decarbonization initiatives in these countries. "In particular, investments in energy efficiency can neutralize the effects of ...
