ESS-GRID is a high voltage battery storage system based on lithium iron phosphate battery, which is one of the new energy storage products developed and produced by BSLBATT.

An Energy Storage System (ESS) is a specific type of power system that integrates a power grid connection with a Victron Inverter/Charger, GX device and battery system.

The operation mode of optical storage integrated outdoor energy storage cabinet can be divided into three kinds: grid-connected manual mode, grid-connected automatic mode, and off-grid ...

The BSLBATT Battery Cabinet utilizes a design that separates the battery pack from the electrical unit, increasing the safety of the cabinet for energy storage batteries.
