---

The BMS consists of Battery Management Controller (BMC), Cell Supervising Circuits (CSCs) and Battery Junction Box (BJB). Read more.

Our Battery Junction Box serves as an integrated solution for HV battery switching, monitoring and control - with our Battery Management Controller (BMC) onboard - providing voltage, ...

A Battery Management System (BMS) is an electronic control unit that monitors and manages rechargeable battery packs to ensure ...

Futavis manages to make your battery efficient, durable and reliable with integrated circuits and a modular design of the BMS. From engineer to engineer, we are on hand to provide advice and ...

A Battery Management System (BMS) is essential for ensuring the safe and efficient operation of battery-powered systems. From real ...

Futavis manages to make your battery efficient, durable and reliable with integrated circuits and a modular design of the BMS. From engineer to ...

The massive electrification efforts happening in the automotive industry are driving the need to reduce the complexity of BMS by adding electronics in the junction box, while enhancing ...

The battery management system and electronical battery disconnect unit consist of several components designed to monitor, manage, control, and disconnect the battery cells of a ...

A Battery Management System (BMS) is essential for ensuring the safe and efficient operation of battery-powered systems. From real-time monitoring and cell balancing to thermal ...

Through constant measurement, analysis, and control of electrical and thermal characteristics, a BMS battery management system guarantees optimal performance. The ...
