BRING is active in the research and development of various rechargeable energy storage systems and energy technologies for e-mobility and stationary applications.

Research and development of various rechargeable energy storage systems and energy technologies for Lightweight and Heavy-duty vehicles, electric vessels and utility scales.

Energy storage can stabilise fluctuations in demand and supply by allowing excess electricity to be saved in large quantities. With the energy system relying increasingly on renewables, more ...

With more than 120 specialists, we form a multidisciplinary team that supports the transition to a more environmentally friendly and electrified mobility and transport system. A unique mix of ...

Innovative materials, strategies, and technologies are highlighted. Finally, the future directions are envisioned. We hope this review will advance the development of mobile ...

MOBI's Battery Innovation Centre is the main Belgian expertise centre for research and development of energy storage systems for traction and ...

With more than 120 specialists, we form a multidisciplinary team that supports the transition to a more environmentally friendly and electrified ...

"This first storage project in Belgium - our largest in Europe - will help ensure the stability of the Belgian and European grids to allow for greater development of renewable ...
