Will Canberra's energy supply be future-proofed?

The ACT Government is future-proofing Canberra's energy supply by expanding its renewable energy storage with a new partnership with global specialist energy storage business, Eku Energy, launched by Macquarie's Green Investment Group.

What is the Big Canberra battery project?

The Big Canberra Battery project will provide renewable energy security across the electricity grid. It will help grow the ACT's renewable energy sector, provide more local employment opportunities, and deliver a positive financial return for the territory. Building a cleaner future

What does the Big Canberra battery mean for Eku energy?

The Big Canberra Battery represents a significant milestone for Eku Energy as we celebrate our first GWh of battery energy storage in delivery in Australia. This brings our global portfolio of battery energy storage assets to over 4GWh.

How many megawatts will a battery deliver in Canberra?

The Government says the battery will deliver at least 250 megawatts of power, enough stored renewable energy to supply one-third of Canberra for two hours during peak demand.

Eku Energy has finalized financing for its 250 MW/500 MWh energy storage system in Canberra, contributing to the energy security of the ACT and its ambitious climate goals.

Energy storage developer Eku Energy has started constructing a 250MW/500MWh battery energy storage system (BESS) in Canberra, the Australian Capital ...

Over the next year, three new community-scale battery energy storage systems (BESS) will be deployed across Canberra to optimize solar energy usage, stabilize grid ...

The large-scale 250 megawatts (MW) battery will store enough renewable energy to power one-third of the city of Canberra for two hours during peak demand, helping to ...

The ACT Government is future-proofing Canberra's energy supply by expanding its renewable energy storage with a new partnership with global specialist energy storage business, Eku ...

In partnership with Eku Energy, construction is underway on concrete bases for the batteries and the main switching building at ...

The large-scale 250 megawatts (MW) battery will store enough renewable energy to power one-third of the city of Canberra for ...

In partnership with Eku Energy, construction is underway on concrete bases for the batteries and the main switching building at Williamsdale. The large-scale battery energy ...

Australia's capital is stepping into the renewable energy spotlight with its ambitious Canberra energy storage reservoir project.

As cities transition away from fossil fuels and energy consumption increases, storing the surplus of renewable energy is ...
