---

Energy storage beyond lithium ion explores solid-state, sodium-ion, and flow batteries, shaping next-gen energy storage for EVs, grids, and future power systems.

In tandem with the fair, the CIBF2025 Conference on Advanced Batteries will address critical themes within the industry. Attendees can expect discussions on the latest developments in ...

The 17th Shenzhen International Battery Technology Exchange Conference/Exhibition (CIBF 2025) brings together the strongest forces of the entire lithium ...

Funded in partnership with the New York State Empire State Development (ESD), the NSF Energy Storage Engine is working with coalition partner RIT Battery Development ...

Energy storage has emerged as one of the most promising branches within various battery technology applications, with numerous ...

TIANJIN, China, April 7, 2025 /PRNewswire/ -- The 17 th China International Battery Fair (CIBF2025), Asia's premier battery industry gathering, will be held at the Shenzhen ...

The China International Battery Fair 2025 will showcase groundbreaking advancements in energy storage systems, featuring global leaders in battery technologies.

The upcoming CIBF2025 will showcase groundbreaking advancements in battery technology, shaping the future of energy storage solutions and economic growth.

Energy storage has emerged as one of the most promising branches within various battery technology applications, with numerous companies in the industry showcasing ...

The energy storage industry walked a bumpy road in 2025, but eyes are turning toward 2026's tech stack. While lithium-ion remains dominant, pressure is building for longer ...
