A deep dive into how energy storage supports renewable integration, reduces curtailment, and enhances reliability across interconnected and remote regions.

La empresa colombiana Erco Energy ha anunciado que implementará un sistema de almacenamiento en baterías de 6,9 MWh en el parque solar La Martina, de 14,7 MW de ...

Proposed new rules seek to provide greater flexibility for developers of renewable energy projects with storage components.

Colombia is making waves in renewable energy with the groundbreaking Medellín Mega Solar Energy Storage Project. This initiative combines solar power generation with cutting-edge ...

Colombia's first grid-scale battery energy storage system (BESS) came online in 2023 near Medellín - a 20MW/40MWh behemoth that's essentially a giant Tesla Powerwall for ...

Colombia's government has inaugurated Sol de Perijá, the country's first community energy project integrating solar power and advanced battery storage, marking a ...

Celsia has deployed the battery energy storage system (BESS) at its 9.9MW Celsia Solar Palmira 2 farm in Valle del Cauca to help increase the generation capacity of the ...

Celsia has deployed the battery energy storage system (BESS) at its 9.9MW Celsia Solar Palmira 2 farm in Valle del Cauca to ...

AES is the world leader in lithium-ion-based energy storage, both through our business project and joint venture, Fluence. We pioneered the technology over one decade ago, and today ...

Located in the city of Barranquilla in northern Colombia, this project will consist of a 45 MWh lithium-ion battery energy storage system and is expected to reach commercial operation by ...
