The expanded program aims to enhance access to quality, climate-resilient WASH services to directly benefit 12,000 children and families, and their broader communities, in Colombia's La ...

Explore successful solar pumping solutions for agriculture, drinking water, and pond management. SAMKING solar pumps in real-world use.

The expanded program aims to enhance access to quality, climate-resilient WASH services to directly benefit 12,000 children and families, and their ...

The floating solar system is designed to sit on top of the water and withstand water-level fluctuations of up to 120 feet.

A solar water pump is a mechanical pump powered by electricity generated using photovoltaic panels. It is popularly referred to as a solar water pumping system because it requires several ...

Las Piedras is a community that currently depends on a single gasoline-powered pump to obtain its water from a local reservoir. We are replacing the existing water pump with a solar-powered ...

In September 2020, Shenzhen Solartech SPM600H 600W permanent magnet solar pumping system was successfully installed in Villiavicencio, ...

To date, 20 450W solar panels have been installed, with a combined generating capacity of 9 kW, enough to power the hydraulic ...

Noria Energy will help differentiate production and efficiency of Aquasol to that of a ground-mounted solar system installed on the shore as part of the pilot project.

In September 2020, Shenzhen Solartech SPM600H 600W permanent magnet solar pumping system was successfully installed in Villiavicencio, Colombia. The system is with total water ...
