-----

Manufacturer of DC to AC power inverters. Available in 800 to 1600 W, 1 to 2 kVA, 40 to 150 VDC and 100 to 120 VAC power supply. Various features include remote access, single point ...

The PSR-2200-48 can power critical loads and back-up systems during power outages and is ideal for use in mobile setups such as traffic management equipment, mobile command ...

These inverters provide seamless DC to AC conversion, ensuring uninterrupted power to critical systems such as essential communication systems, critical electronic devices and industrial ...

This industrial grade inverter is designed for industrial or radio / microwave communication applications where critical power is a must. Please call for pricing and application specifics. ...

Rackmount Inverter 2RU Series by Newmar Powering the Network: These rackmount telecom DC-AC power inverters provide seamless back-up power for AC powered communications ...

The design of the inverter ensures a seamless transfer between the AC and DC inputs, giving zero transfer time and eliminating the need for a Static Transfer Switch.

In the intricate web of modern communication, the role of inverters is pivotal. These electronic devices, often found in signal transmission systems, convert direct current (DC) to ...

These inverters provide seamless DC to AC conversion, ensuring uninterrupted power to critical systems such as essential communication ...

In the tabs below, discover the solutions Infineon offers and recommends for AC-DC power converters for telecom infrastructure. Explore our system solutions, evaluation boards and ...

The Eaton Telecom Inverter is an innovative dual input inverter solution designed for your applications where very high reliability of your AC supply is required.
