In April 2025, Panasonic announced a strategic shift in its battery production, focusing more on lithium iron phosphate (LFP) batteries to align with the growing demand for cost-effective and ...

These developments indicate a growing demand for advanced energy storage systems in the Asia Pacific region, fueled by innovation and government backing for renewable energy integration.

Buckle up - the Asia-Pacific energy storage ride is just getting started. Whether you're a tech geek, investor, or just someone who likes keeping the lights on, understanding ...

This report analyses the cost of lithium-ion battery energy storage systems (BESS) within the APAC grid-scale energy storage segment, providing a 10-year price forecast by both ...

In 2021, China ranked first in the world in terms of pumped storage hydropower capacity, with more than 36.3 gigawatts. The Japan ...

The latest capex and Levelised Cost of Storage (LCOS) for large, long-duration utility-scale Battery Energy Storage Systems (BESS) across global markets outside China and ...

DOE's Energy Storage Grand Challenge supports detailed cost and performance analysis for a variety of energy storage technologies to accelerate their development and deployment.

In April 2025, Panasonic announced a strategic shift in its battery production, focusing more on lithium iron phosphate (LFP) batteries to align with the ...

Market dynamics, technical developments and regulatory policies that could be decisive for energy storage deployment in Australia, Mainland China, ...

DOE's Energy Storage Grand Challenge supports detailed cost and performance analysis for a variety of energy storage technologies to ...
