Croatia recorded a landmark year for renewable energy in 2025, with solar, wind and renewable thermal power sources taking a leading role in the national electricity system ...

Croatia installed a total 397 MW of solar in 2024, bringing its cumulative capacity to around 872 MW, and surpassed the 1 GW milestone in May.

In 2025, Croatia achieved a significant milestone by surpassing 1 GW of installed solar capacity, marking a pivotal moment in the country's renewable energy journey.

But a group of islanders is now trying to harness the power of the 3,000 hours of sun they enjoy yearly and help the community ...

Croatia installed a total 397 MW of solar in 2024, bringing its cumulative capacity to around 872 MW, and surpassed the 1 GW ...

This study analyzes the record electricity consumption in Croatia during the July 2024 heatwave and evaluates how the increased deployment of onshore wind and solar ...

In 2025, Croatia achieved a significant milestone by surpassing 1 GW of installed solar capacity, marking a pivotal moment in ...

Croatia's electricity system reached a defining moment last year, with biomass and biogas facilities playing a crucial role alongside solar and wind power to deliver a landmark ...

Croatia is expected to surpass 1 GW of solar power by 2025, driven by a significant increase in installations and supportive policies. ...

Croatia crossed the 1 GW milestone in May 2025 and, if current trends persist, could reach 1,290 MW by December 2025. The self-supply sector, particularly households and ...
