In a groundbreaking move towards sustainability, Etix Everywhere is proud to announce its commitment to green energy solutions for data centres in Thailand.

Can you retrofit an old data center for renewable integration? Yes -- through a mix of LED retrofits, battery-backed lighting, modular ...

Thailand is implementing direct Power Purchase Agreements to attract data centre investments. This shift from the state-controlled energy ...

Hyperscalers and cloud providers are investing in solar energy to reduce emissions, improve resilience, and take pressure off local grids. This marks a significant shift ...

In order to develop the green data center driven by solar energy, a solar photovoltaic (PV) system with the combination of compressed air energy storage (CAES) is proposed to ...

Companies are actively seeking ways to reduce their carbon footprints and operate more responsibly. One area ripe for improvement is data centers, notorious for their ...

The installed photovoltaic capacity of the whole system is 250kw, the energy storage system uses 250KW PCS and 520KWh lithium iron phosphate battery pack, and the ...

Can you retrofit an old data center for renewable integration? Yes -- through a mix of LED retrofits, battery-backed lighting, modular solar, and rooftop redesign.

The Chennuo Electrical 250kW/500kWh Integrated Container Energy Storage System, with its $\geq 97\%$ maximum conversion efficiency and industrial-grade reliability, is ...

Telecom stations, data centers, and other critical facilities benefit from the reliable backup power and energy management capabilities of our energy storage container systems. The proven ...
