How long does a base station battery last?

When a sensor on your system is triggered, it sends a signal to the Base Station, which sounds the loud, 100 dB siren and notifies you immediately. If the Base Station is unplugged or the power goes out, the backup battery keeps you covered for up to 24 hours.

What are the different types of base stations?

Some basic types of base stations are as follows: Macro-base stations are tall towers ranging from 50 to 200 feet in height, placed at strategic locations to provide maximum coverage in a given area. Those are equipped with large towers and antennas that transmit and receive radio signals from wireless devices.

What are the components of a base station?

**Power Supply:** The power source provides the electrical energy to base station elements. It often features auxiliary power supply mechanisms that guarantee operation in case of lost or interrupted electricity, during blackouts. **Baseband Processor:** The baseband processor is responsible for the processing of the digital signals.

What is a base station (Gen 3)?

**Base Station (Gen 3) Overview and Installation Guide | SimpliSafe Support Home** The Base Station is the brains of your system. It sends alarm signals to the monitoring center\* with built-in cellular and Wi-Fi connections, a battery backup that lasts up to 24 hours, and a 100 dB siren.
