Should you rent or buy a generator for a refrigerated shipping container?

A commercial generator for your 20ft or 40ft refrigerated shipping container will give you the protection and peace of mind you need. But how do you know which one to pick? We'll discuss the important factors you need to consider whether you rent or buy a generator for your reefer containers. What is a refrigerated shipping container?

Do reefer containers use generators?

For transportation by road or rail, reefer containers often use a diesel-powered generator set (gen-set). These gen-sets are mounted on the container or the transport vehicle, providing a reliable power source throughout the journey.

Do you need a commercial generator for a shipping container?

When your company's future, your patients' wellbeing, and the perishable goods in your inventory are all on the line then you can't risk a power outage. A commercial generator for your 20ft or 40ft refrigerated shipping container will give you the protection and peace of mind you need. But how do you know which one to pick?

What type of generator is used for refrigerated shipping containers?

o Diesel generators: Diesel generators are the most common type of generator used for refrigerated shipping containers. They are reliable, durable, and can provide a lot of power. However, diesel generators can be noisy and expensive to operate.
