How does the European Commission support 5G?

The European Commission identified 5G opportunities early, establishing a public-private partnership on 5G (5G-PPP) in 2013 to accelerate research and innovation in 5G technology. The European Commission has committed public funding of more than EUR700 million through the Horizon 2020 Program to support this activity.

What is the European 5G Observatory?

To monitor the progress of the 5G Action Plan and the Digital Decade strategy, the Commission is supporting the European 5G Observatory. The Observatory is a monitoring tool covering major market developments in Europe in a global context.

Why should 5G networks be harmonised across Europe?

The deployment of 5G networks depends closely upon access to radio spectrum, the basis of wireless technologies. As the rate of connected devices and their use increases, spectrum resources and their uses have to be harmonised across Europe to allow for interoperability of infrastructure across borders.

When will 5G be available in Europe?

The objective of the action plan was to start launching 5G services in all EU Member States by end 2020 at the latest. Following this, it suggests a rapid build-up to ensure uninterrupted 5G coverage in urban areas and along main transport paths by 2025.

What is 5G mobile broadband? The fifth generation of mobile broadband, or 5G, is the most advanced mobile broadband technology developed in response to the increasing demands for ...

Base station operators deploy a large number of distributed photovoltaics to solve the problems of high energy consumption and high electricity costs of 5G base stations.

Container-type energy base station: It is a large-scale outdoor base station, which is used in scenarios such as communication base stations, smart cities, transportation, power systems ...

The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated containerized solutions now ...

The European Commission has committed public funding of more than EUR700 million through the Horizon 2020 Programme to support this activity. These activities are accompanied by an ...

With a solid commitment to sustainability, this investment aims to accelerate the rollout of high-performance infrastructure, including 5G and gigabit networks, to ensure secure ...

This article will discover how EU Site Energy Trading (ETS) can be mixed with Telecom Base Station Energy Management to pressure effectivity and sustainability, thereby ...

The newly funded projects will support the roll out of 5G standalone infrastructure in local communities and along European transport paths.

Explore the available EU funding opportunities by searching for calls for proposals within your topics of interest, find partners and submit a proposal.

This paper presents a European-wide techno-economic and environmental assessment of retrofitting 5G macro-cell base stations with grid-connected solar photovoltaic ...
