How big is the Asia air conditioner market?

The Asia air conditioner market size was valued at USD 12.16 billion in 2024. The market is projected to grow from USD 12.74 billion in 2025 to USD 18.87 billion by 2032, exhibiting a compound annual growth rate (CAGR) of 5.77% over the forecast period.

Which air conditioner segment dominated the Asia air conditioner market in 2024?

Significant household penetration of affordable air conditioning systems featuring analog interfaces, buttons, and dials resulted in the manual segment holding a majority of the Asia air conditioner market share in 2024.

Who are the leading players in Asia air conditioner market?

Asia air conditioner market is competitive with the presence of leading companies, including Voltas Limited, Samsung Electronics Co., Ltd., Hitachi, Ltd., GREE ELECTRIC APPLIANCES, INC., and DAIKIN INDUSTRIES, Ltd. in the market. These top 5 players account for 25.86% of the market share in 2024.

Can solar energy be used in building air-conditioning systems?

Singh and Das [23 - 26] investigated the potential application and operational strategies of solar energy in the field of building air-conditioning systems, the findings revealed that the incorporation of solar energy can substantially decrease the energy consumption of air-conditioning systems while enhancing their economic viability.

According to the International Energy Agency (IEA), air conditioning unit penetration is higher among households in Southeast Asian countries, including Singapore ...

The Asia Pacific Solar Thermal Hybrid Air Conditioner Market is expected to witness sustained global growth driven by innovation, digitization, and emerging economy ...

For a comprehensive evaluation, solar absorption cooling (SABC) and vapor compression cooling systems are selected as reference systems. Energy, environment, and ...

For a comprehensive evaluation, solar absorption cooling (SABC) and vapor compression cooling systems are selected as ...

According to the International Energy Agency (IEA), air conditioning unit penetration is higher among

households in Southeast ...

In regions facing extreme heat conditions like the Middle East and parts of Southeast Asia, traditional air conditioning systems are becoming less sustainable due to high operational ...

Growing demand for energy-efficient cooling solutions is projected to boost the solar air conditioning market. Consumers and businesses are actively pursuing methods to ...

Between 2025 and 2035, the solar air conditioning market is expected to grow approximately 4.2 times, driven by urbanization, industrialization, and rising energy costs.

In this blog, we'll explore the return on investment of solar air conditioners in 2025 across key regions-- Asia, Africa, Middle East, Europe, and North America --to understand how location, ...

The Asia Solar Air Conditioning Market is witnessing rapid growth as demand for energy-efficient and sustainable cooling solutions rises across residential, commercial, and industrial sectors.
