How many MW of solar power for Estonia?

Dornier Group Start /Aktuelles /A milestone for the energy transition in the Baltic States: 244 MW of solar power for Estonia! A milestone for the energy transition in the Baltic States: 244 MW of solar power for Estonia! Great news from our Renewables business unit!

What percentage of Estonia's energy supply is renewable?

According to the International Renewable Energy Agency (IRENA), in 2020, renewable energy accounted for 32% of Estonia's Total Energy Supply (TES). The composition of this renewable energy mix was heavily dominated by bioenergy, which represented 93% of renewables.

Will Estonia be fully solar powered by 2030?

Estonia has seen a significant increase in its solar power capacity in 2022, becoming one of the leaders in solar power per capita among EU members. With growing investments and innovative startups, it now aims to be fully green-powered by 2030.

What is the largest solar project in Estonia?

Together with our lead partner Connecto, Sunly, the project developer and investor, has awarded us the contract for the engineering and construction of the Risti 244 MW solar power plant in Estonia. This impressive solar project is currently the largest PV project in the Baltic States and in Estonia in particular.

from the power sector. This assumes that, if renewable power did not exist, fossil fuels would be used in its place to generate the same amount of power and using the sa

With a commitment to 100% renewable electricity by 2030, Estonia is accelerating its efforts to harness solar energy to bolster its grid and ensure energy resilience.

Estonia's renewable energy sector marked a major milestone in 2024, attracting EUR244 million in investments from the European Bank for Reconstruction and Development ...
