Can heavy solar equipment be delivered in a shipping container?

Heavy solar equipment can't always be delivered in a standard shipping van or shipping container, it's at risk of being damaged during transit, and it needs to arrive onsite according to energy project timelines. Effective supply chain management requires top-notch renewable energy logistics.

Why should you choose LZY solar panels on shipping container?

Efficient hydraulics help get the solar panels ready quickly. Due to its construction, our solar panels on shipping container offers unmatched flexibility and maneuverability. Sensitive solar arrays can be effectively protected from storms, vandalism and all possible threats. What is LZY's mobile solar container?

How is a solar container lifted?

The solar container is lifted using the corner corners in the roof frame. With these in the base frame, the module can be fixed and secured during transport using the twist-lock system. The solar rail system consists of individual segments that are used during construction connected to the fixed, centrally arranged container floor.

Are solar panels a good option for final-mile logistics?

Successful final-mile logistics is a careful science regardless of the commodity being delivered, but solar panels come with distinct challenges.
