What is a shipping container clinic?

A shipping container clinic is a type of shipping container architecture using intermodal containers (shipping containers) as the structural element of a medical clinic that can be easily deployed to remote regions of the world. Shipping containers are ideal because of their inherent strength, wide availability and relatively low cost.

How much does it cost to build a container clinic?

The containers were both 40 feet long and cost around \$12,000 to build. In November 2010, Containers 2 Clinics sent a prototype clinic to be used on site at Grace Children's Hospital in Port-au-Prince, Haiti.

What is a solar powered clinic?

Our solar powered clinics have been designed and engineered to be energy efficient, operating on less than 500 watts of electricity. From the air-conditioning system to the choice of lighting, our clinics utilize only green technology and medical equipment.
