UAE-based Global South Utilities inaugurated a 53-megawatt solar project in Yemen to power 330,000 households, significantly enhancing local electricity access. ...

According to the World Bank, Yemen has the lowest level of electricity connection in the Middle East, with only 40% of the population having access to electricity. Rural areas are particularly badly affected. Industrial concerns, hospitals and hotels have their own back-up generators. To address these shortages, a 340-MW gas-fired power plant is under construction-and close to completion-at Marib. Further expansion to the facility, which will add an additional 400 MW of ou...

The completion of this 6.5 MW project underscores the growing importance of renewables in Yemen's power sector and highlights the country's abundant solar resources.

To address these shortages, a 340-MW gas-fired power plant is under construction-and close to completion-at Marib. Further expansion to the facility, which will add an additional 400 MW of ...

This project, which is the largest of its kind in Yemen, is being carried out in partnership with the Ministry of Electricity and Energy. ...

The completion of this 6.5 MW project underscores the growing importance of renewables in Yemen's power sector and ...

This project, which is the largest of its kind in Yemen, is being carried out in partnership with the Ministry of Electricity and Energy. According to ministry data, the second ...

The Aden solar power station is Yemen's largest strategic clean energy project, with a production capacity of 249 megawatts, of which 120 megawatts have already been ...

Yemen's first solar power plant, a 120-megawatt facility in the Al-Buraiqah district of Aden, was inaugurated on July 15, 2024, and supplies electricity to more than 70,000 ...
