What are shipping container solar panels?

Our shipping container solar panels are designed to withstand the rigors of outdoor use and provide long-lasting performance. We utilise high-quality solar panels that are built to withstand harsh weather conditions, including extreme temperatures, rain, and wind.

What is a solar container build?

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency setups, or as a portable backup energy system. What's included in a solar container build?

Are solar containers safe?

Yes-- all solar containers are built from weatherproof, lockable shipping containers. Your gear is safe from the elements and secure from unauthorised access. Can the system be expanded later on?

What are the benefits of using shipping container solar panels?

The benefits of using shipping container solar panels are numerous. Here are some key advantages: Energy Independence: By harnessing solar energy, you can become less reliant on traditional power sources, reducing your dependence on the grid. This is particularly beneficial in remote locations or areas where power supply is unreliable or expensive.
