How much solar power does Ukraine have?

Households in Ukraine tend on average to have larger rooftop solar PV systems than in other countries. The feed in tariff is available for larger systems and from 2020 may be up to 50 kW and can be both rooftop or ground mounted. In March 2019 the power of residential solar was an average of 21.5 kW per family.

Do you need a permit to install solar panels in Ukraine?

The Cabinet of Ministers encourages the installation of solar power plants by both individuals and legal entities. Starting from July 1, 2023, no permit is required to install solar panels with a capacity of up to 30 kW in Ukraine, and preferential "zero" loans for households are issued for the purchase of equipment with a capacity of 1-10 kW.

How to get a loan for solar power plants in Ukraine?

Documents required to obtain a loan for solar power plants To obtain a loan, you need: - Passport of a citizen of Ukraine (an ID card is acceptable); - Certificate of identification number (TIN) assignment; - A document on income and withholdings for the last 6 months; - Invoice or contract for the purchase and installation of equipment;

How much does a solar power plant cost?

The cost of a mini-station based on a portable charging station, which will meet the minimum needs of a family with gas heating in winter, is about 100 thousand UAH. A small solar power plant with a turnkey inverter costs about \$5,000. It is worth noting that most houses have enough power from 5 to 15 kW.

What are the prices for the equipment? The cost of a small solar power plant depends on its capacity. For example, equipment with a ...
