India's KPI Green Energy Ltd (BOM:542323), the solar and hybrid vertical of India's KP Group, has received authorisation to connect to the grid 32.4 MW of photovoltaic (PV) and ...

Large-scale solar parks, like those under the Ultra Mega Solar Power Projects program, are adding gigawatts of clean capacity, while targeted efforts are bringing electricity ...

As the world's third-largest producer of renewable energy, India has made remarkable strides in the solar sector, crossing the milestone of 100 GW of installed capacity. ...

What are the top renewable energy sites in India for solar power projects? Top renewable energy sites include areas with high solar insolation where extensive solar parks are developed and ...

India has crossed the 500 GW electricity capacity milestone, with over 51% from non-fossil sources. This achievement marks significant progress towards a sustainable energy ...

India gets plenty of sunlight throughout the year, which makes solar power highly efficient India's rapid solar energy expansion is widely hailed as a success. But without a plan ...

India's renewable energy expansion reached historic highs in 2025, reshaping power capacity, manufacturing strength, and clean energy.

Solar Energy Corporation of India (SECI), a public sector undertaking, is responsible for the development of solar energy industry in India. Hydroelectricity is administered separately by ...

Video on PM SURYAGHAR MUFT BIJLI YOJNA Video on Solar Parks in India Solar PV Potential of India (Ground Mounted) 2025 Solar PV Potential of India (Ground Mounted) ...

All time maximum solar and wind power generation is 65,804 MW and 28,974 MW as of 7 March 2025 respectively. India ranks 5th globally for installed hydroelectric power capacity. As of 31 March 2020, India's installed utility-scale hydroelectric capacity was 45,699 MW, or 12.35% of its total utility power generation
