The Project Development Objective is to increase access to lower cost and cleaner electricity supply in project areas and to reestablish the electricity supply industry.

Compared with traditional energy storage technologies, mobile energy storage technologies have the merits of low cost and high energy conversion efficiency, can be flexibly located, and cover ...

To support the global transition to clean electricity, funding for development of energy storage projects is required. Pumped hydro, batteries, hydrogen, and thermal storage ...

For this purpose, two solar plants with a total capacity of 8 megawatts, a containerized lithium-ion power storage system with a capacity of 2 megawatt hours, and three modern diesel ...

The microgrid consists of two solar plants with a total capacity of 8MW, a containerised lithium-ion power storage system with a capacity of 2MWh and three modern ...

on battery storage system in Somaliland. The local utility company can now supply 100% of its load with green solar energy during the day and completely shut down the diesel generators.

Estimates vary, but the total installed capacity across Somaliland hovers around 60 to 80 megawatts (MW) -- a tiny fraction of what the population actually needs. To put this into ...

This article highlights the current status of Somaliland's energy sector, its vast renewable energy potential, ongoing reforms, and the investment opportunities available for ...

Genel is in advanced oil exploration with OCTG planned for Toosan drilling including installation of well taps. The Somaliland government awarded Genel Energy license to explore oil within its territory. Results of a surface seep study completed early in 2015 confirmed the outstanding potential offered in SL-10B and SL-13 block and Oodweyne block with estimated oil reserves of 1 billion barrels each.
