Built for the toughest environments, the MultiTech Conduit® IP67 Base Station delivers secure, reliable LoRaWAN® connectivity for outdoor and industrial IoT deployments.

This flexible solution provides durable, low-power, low-power, wide area network connectivity in support of M2M and IoT applications for both LoRa service providers and individual ...

LENS has the capability to assign unique access rights to individual users, add gateways and LoRa end nodes in bulk, or create separate organizations and network segmentation to ...

It is suitable for meteorological data collection and transmission. The product supports both Wi-Fi and 4G connections for receiving and processing multiple sensor data types. Outdoor Use: In ...

The presented paper proposes a model of the Internet of Things (IoT) based Wireless Sensor Network (WSN) base station node for outdoor localisation. The node is

This Outdoor LoRaWAN Cellular Gateway is one of our flagship industrial/ outdoor gateways within our LoRaWAN range of devices. It lets you bridge LoRa wireless networks to ...

Pharos Base Stations works seamlessly with TP-LINK dish and sector antennas to provide efficient PtP and PtMP data transmission. Pharos Base Stations also feature a built-in ...

The MultiConnect Conduit IP67 Base Station is used in a wide variety of applications such as energy, agriculture and smart cities and supports both public and private LoRa networks.

Designed for easy deployment, the solution includes an IP67 enclosure, external LoRa antenna to improve outdoor range and Ethernet or optional 4G-LTE backhaul. It can be deployed as part ...

It is suitable for meteorological data collection and transmission. The ...
