SINEXCEL and Wasion Energy have announced the commissioning of the Coopesantos Wind Power Energy Storage System, a new grid-connected facility located in Costa Rica.

The project will include enough lithium-ion batteries to supply up to a maximum of eight hours of storage capacity at its rated output and will be able to charge and discharge up to 316 MW of ...

Once completed, the project will be the largest battery storage installation in New York City. The facility will be able to power more than 10,000 households during peak demand ...

New York City's largest battery storage facility will replace a natural gas peaker plant unit retiring in 2025.

This innovative clean energy solution positions the 27-acre waterfront Ravenswood industrial site to serve as a central hub connecting clean ...

This innovative clean energy solution positions the 27-acre waterfront Ravenswood industrial site to serve as a central hub connecting clean energy sources, like offshore wind and upstate ...

Tilos is now the first island in southern Europe to build a hybrid power station with battery storage, which could become an example for other isolated communities looking to go green.

This will generate 600MW of clean, renewable and secure electricity and includes 600MW of Battery Storage that will store then release energy as needed. Island Green Power identifies ...

Ravenswood was originally built and owned by Consolidated Edison of New York Inc. (Con Edison) in 1963. The first two units constructed in 1963 were Ravenswood 10 and 20, each having a generating capacity of approximately 385 megawatts. Then, in 1965, Ravenswood 30 (commonly called "Big Allis") was commissioned with a generating capacity of nearly 981 megawatts. A new 1,000 MW unit was originally planned to be located on the north side of the East River Generating Station
