The data consists of three year hourly solar radiation and power production under optimized conditions. This dataset will form the basis of estimation of a hypothetical solar PV ...

Find and download solar resource map images and geospatial data for the United States and the Americas. For more information on NLR's solar resource data development, see the National ...

It includes corresponding PV facility information, including panel type, site type, and initial year of operation.

In 2024, solar power provided about 22% of Hawaii's total electricity, about two-thirds of which came from small-scale, customer-sited solar panel systems. Hawaii has the ...

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find more about Ember's methodology in this ...

Let's face it - if you're living on a tropical island or coral reef ecosystem, you're already winning at geography. But here's the kicker: these locations get about 30% more annual sunlight than ...

Electricity systems on small islands are frequently over-sized, with high reserve power generation capacity and ancillary services needed locally to respond to daily and ...

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output ...

Estimates the energy production and cost of energy of grid-connected photovoltaic (PV) energy systems throughout the world. It allows homeowners, small building owners, installers and ...

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can ...
