Is smart glass a good idea for Jakarta?

Designers and architects in Jakarta are making note of the advances in smart glass technology. The glass that turns opaque at the push of a button provides privacy, offers unobstructed views, and saves on energy bills - a great solution for this ever-expanding city.

What is the most famous glass building in Jakarta?

Perhaps the most famous is Wisma 46, with its gracious glass exterior, which was considered ahead of its time when it was built in 1996. Designers and architects in Jakarta are making note of the advances in smart glass technology.

What is the biggest rooftop solar power plant in Jakarta?

"Today we celebrate an extraordinary achievement, the inauguration of the largest rooftop solar power plant in Jakarta, located right at Grand Indonesia. This project will make a major contribution to energy savings and carbon-emission reductions," Iwan said at the Jakarta ceremony.

With the projected growth in photovoltaics, the demand for glass for the solar industry will far exceed the current supply, and thousands of new float-glass plants will have to be built to ...

Designers and architects in Jakarta are making note of the advances in smart glass technology. The glass that turns opaque at the push of a button provides privacy, offers unobstructed ...

The embassy in Jakarta features a cutting-edge design incorporating Onyx Solar's amorphous silicon semi-transparent glass on a photovoltaic ...

Solar Gard menjawab kebutuhan konsumen akan kaca film premium di negara tropis seperti Indonesia yang memerlukan penolakan panas tinggi.

The solar photovoltaic glass market in Indonesia is being driven by the growing focus on renewable energy sources and the government's push for solar power adoption.

The embassy in Jakarta features a cutting-edge design incorporating Onyx Solar's amorphous silicon semi-transparent glass on a photovoltaic canopy. Each individual glass panel was ...

The new facility, which will support glass and solar panel production, is expected to be built on the island of Rimpang, and data ...

To fully capture these benefits, however, Indonesia must ensure that the 100-GW solar program prioritizes locally made components rather than relying entirely on imported ...

The project, valued at IDR 15-20 billion, is the largest commercial-building rooftop solar installation in the province of DKI Jakarta. It is capable of producing around 1.7 million ...

The Memorandum of Understanding, signed between Xinyi International Investment and Jakarta-based PT Makmur Elok Graha consists of a plan ...
