Government Market News | Mary Scott Nabers Insights | Battery storage projects surge as utilities prepare for next grid era in 2026 | Battery storage projects nationwide are ...

More and more, big arrays of lithium-ion batteries are being hooked up to electrical grids around the U.S. to store power that can be discharged in times of high demand.

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...

A boom in battery storage has bolstered the demand outlook for lithium in 2026, driving hopes for an accelerated turnaround for an industry struggling with oversupply.

World's largest vanadium flow battery goes online in China with 1 GW solar plant The record-breaking battery will boost renewable energy use by over 230 million kWh a year.

Each cabinet contains 20 new lithium-ion batteries that, starting this spring, will feed power into California's often-strained electrical grid, helping prevent blackouts. They're ...

To solve the challenges that the size of large batteries poses to production lines and manufacturing processes, EVE Energy has specially built the 60GWh Super Energy ...

Elevate Renewables has completed contracting to construct a battery storage facility to store power during non-peak hours and discharge power during peak demand ...

Energy storage beyond lithium ion explores solid-state, sodium-ion, and flow batteries, shaping next-gen energy storage for EVs, grids, and future power systems.

This Review discusses the application and development of grid-scale battery energy-storage technologies.
