The nation aims for energy independence, targeting 100% electricity generation from renewables by 2030 and complete reliance on clean sources by 2050. Despite successes, challenges ...

Danish clean energy developer European Energy will use part of a EUR145 million loan package secured from two Swedish lenders to ...

Lithuania plans to procure at least 800MWh of energy storage to help it achieve its goal of reaching 100% renewable electricity by 2030.

Capacity expansion scenarios for generation, energy storage, and transmission are based on long-term plans and studies previously conducted by the stakeholder team.

Trina Storage, the battery energy storage system (BESS) division of solar energy firm Trinasolar, has announced the deployment of ...

Low solar and wind generation combined with maintenance and interconnection constraints led to significant power price spikes in mid-October, highlighting the importance of ...

Once synchronized with the continental European electricity grid (CET), the Energy Cells-managed energy storage system will be able ...

Trina Storage, the battery energy storage system (BESS) division of solar energy firm Trinasolar, has announced the deployment of three new battery storage projects in ...

Once synchronized with the continental European electricity grid (CET), the Energy Cells-managed energy storage system will be able to store and, if necessary, feed electricity ...

Danish clean energy developer European Energy will use part of a EUR145 million loan package secured from two Swedish lenders to construct a battery energy storage system ...
