-----

The Lithuanian Ministry of Energy and Environment has approved additional funding for its energy storage procurement program after strong interest from potential ...

The country has set an ambitious target of reaching 1.5 GW of storage capacity and 4.4 GWh of total storage volume by 2028, far exceeding initial plans. This infrastructure ...

The new advanced heat generation and storage technology is now being implemented in Klaipeda by Lavastream, which is a ...

As it cut ties with Russia's fossil fuel-dominated power grid, Lithuania took another step towards 100% renewable electricity by ...

Trina Storage, the BESS division of solar energy firm Trinasolar, has announced deployment of three new battery storage projects in Lithuania totaling 90MW/180MWh. The ...

Low solar and wind generation combined with maintenance and interconnection constraints led to significant power price spikes in mid-October, highlighting the importance of ...

Danish renewables firm European Energy has secured a EUR145 million (US\$158 million) long-term loan to finance a 78.5MW solar park co ...

As it cut ties with Russia's fossil fuel-dominated power grid, Lithuania took another step towards 100% renewable electricity by launching a large-scale battery storage tender.

This report describes the development of a simplified algorithm to determine the amount of storage that compensates for short-term net variation of wind power supply and assesses its ...

The Butrimonys energy storage system, as a business-owned battery system, supplied part of its stored electricity to the grid for the first time at a moment when it was ...
