-----

Through the EDSI project, DoD is adding resilience by building up storage from grid-supplied power to keep installation lights on as well ...

Designed with A+ grade lithium iron phosphate (LiFePO<sub>4</sub>) battery cells and a smart BMS, it ensures long lifespan and safe operation. With its plug-and-play setup and wheel-mounted ...

Built with reinforced materials and engineered for challenging conditions, these containers provide living quarters, command centers, storage units and medical facilities that can be deployed ...

Our batteries provide a consistent and dependable power source for critical equipment, communication systems, and field operations, ensuring mission continuity in challenging ...

It features a high-quality container enclosure pre-installed with a battery rack, allowing clients to integrate their own battery packs, cooling systems, fire ...

Decentralised lithium-ion battery energy storage systems (BESS) can address some of the electricity storage challenges of a low-carbon power sector by increasing the share ...

These self-contained systems deliver fast-deploying, plug-and-play electricity -- without noise, fumes, or fuel costs. From 100 kWh compact trailers to multi-megawatt container systems, we ...

Antora Energy's BESS stores thermal energy in inexpensive carbon blocks. To charge the battery on a military base, power from the grid or an on-base solar PV will resistively heat the carbon ...

Discover our energy storage shipping containers designed for safe, scalable, and efficient power storage. Ideal for renewable energy projects, grid stabilization, and emergency backup.

It charges using surplus energy, powers the load quietly, and automatically recharges as needed. This cycle reduces generator runtime, lowers diesel fuel dependency, and ensures a ...
