WINDHOEK, Oct. 15 -- Namibia has received the first shipment of equipment for its 51-megawatt (MW) Omburu Battery Energy Storage System ...

The Omburu Energy Storage Project is located in central northern Namibia, with a designed storage capacity of 51 megawatt hours. It can release electricity to the grid during ...

The Namibia Power Corporation (NamPower) has opened the Initial Selection stage for the engineering, procurement, and construction of the 45 MW / 90 MWh Lithops battery ...

The Namibia Power Corporation (NamPower) has opened the Initial Selection stage for the engineering, procurement, and construction ...

Surplus electricity from RE generation as well as cheaper electricity imports from the Southern African Power Pool (SAPP) can be stored in the BESS. The stored energy could supply ...

WINDHOEK, Oct. 15 -- Namibia has received the first shipment of equipment for its 51-megawatt (MW) Omburu Battery Energy Storage System (BESS) project, the country's first utility-scale ...

Let's cut to the chase: In December 2023, Windhoek made history by launching Namibia's first grid-scale energy storage system. This 54MWh project in Erongo Region isn't ...

This groundbreaking initiative marks the country's first utility-scale battery installation and is crucial for strengthening the national electricity grid and supporting the ...

Key contracts have been signed for the first-ever grid-scale battery storage project in Namibia, signifying the African country's dedication to modernising its energy infrastructure, ...

Namibia is not yet self-sufficient, but the combination of grid-scale storage and transmission expansion is laying the foundation for a more resilient and renewable-driven ...
