Will New York double its energy storage goal in 2022?

Hochul announced plans in January 2022 to double New York's previous energy storage goal of 3 GW by 2030. The state released a draft road map in December 2022 showing how it would achieve its new target, including a centralized procurement mechanism to expedite solicitations and deployments.

Should bulk energy storage be added to New York's grid?

Adding bulk energy storage to New York's grid will lower costs, optimize the generation and transmission of power, enhance energy grid infrastructure, and ensure the reliability and resilience of the State's electricity system.

What is the energy storage strategy & roadmap (SRM)?

WASHINGTON, D.C. - The U.S. Department of Energy (DOE) today released its draft Energy Storage Strategy and Roadmap (SRM), a plan that provides strategic direction and identifies key opportunities to optimize DOE's investment in future planning of energy storage research, development, demonstration, and deployment projects.

Will New York deploy 6 GW of energy storage by 2030?

New York will deploy 6 GW of energy storage by 2030 under a framework approved Thursday by the New York Public Service Commission, the office of Gov. Kathy Hochul, D, said in a press announcement.

In December 2020, DOE released the ESGC Roadmap, the Department's first comprehensive energy storage strategy to develop and domestically manufacture energy storage technologies ...

In December 2020, DOE released the ESGC Roadmap, the Department's first comprehensive energy storage strategy to develop and domestically ...

Adding bulk energy storage to New York's grid will lower costs, optimize the generation and transmission of power, enhance energy grid infrastructure, and ensure the ...

The New York Solar Energy Industries Association has recommended nine ways for the administration of New York City Mayor-elect Zohran Mamdani to speed solar and storage ...

Government Market News | Mary Scott Nabers Insights | Battery storage projects surge as utilities prepare for next grid era in 2026 | Battery storage projects nationwide are ...

As the renewable energy sector continues to expand, the essential role of energy storage becomes increasingly pronounced, leading to a more integrated and stable energy future.

As least 15 new battery energy storage systems slated for Staten Island, data shows Published: Jan. 05, 2026, 5:50 a.m.

Hochul announced plans in January 2022 to double New York's previous energy storage goal of 3 GW by 2030. The state released ...

This diverse resource includes energy storage that can provide dispatchable power on intra-day and/or multi-day time-scales, and includes various types of mechanical energy storage, ...

The session focused on New York's ambitious 6GW energy storage target by 2030 and the NYSERDA-led solicitations for 4.7GW of storage across the utility-scale sector.
