Why do New Zealand homes need battery storage?

In most New Zealand homes, a large proportion of the energy produced by solar panels is sent back to the grid because it's generated when it's not needed, i.e., the middle of the day. However, adding home battery storage to a new or existing solar power system allows you to store your unused energy.

Are solar batteries a good choice for NZ conditions?

Our Solar Batteries are proven energy storage solutions for NZ conditions. Founded in 2009 Pylontech are at the top of the battery industry and are commonly rated by industry experts as one of the best 3 manufacturers in the world of lithium batteries.

Why do you need a solar battery storage system?

When it's needed, the batteries can then release this stored power to power your home. This includes at night, on a cloudy day, or even during a blackout. A solar battery storage system allows you to enjoy your solar power for longer. During blackouts, solar battery storage systems ensure you don't have to eat a cold dinner in the dark.

Which battery is best for solar energy?

The Sigen Battery 5.0-8.0 kWh is the perfect companion for your solar energy system, providing reliable energy storage with unmatched safety and flexibility. The Powerbox Pro is a deep cycle, high capacity LFP battery with improved safety, long lifespan and optimised user experience.
