Will 5G revolutionize Saudi Arabia?

RIYADH: Healthcare, urban living and transportation are all being revolutionized in Saudi Arabia thanks to the Kingdom's enthusiastic adoption of 5G technology, experts have told Arab News.

Is 5G a catalyst for Saudi Arabia's smart city initiatives?

Undoubtedly, 5G technology is an important catalyst in Saudi Arabia's smart city initiatives, providing cutting-edge connectivity for new cities like NEOM and Qiddiya and existing conurbations such as Riyadh and Makkah.

When did the 5G network start in the MENA region?

In 2018, stc group launched the 5G network, marking a significant milestone that initiated a historic transformation in communications and information technology in the Kingdom and the region. The MENA region's development standards differed from the rest, making it the first commercial launch of the 5G network.

How 5G has changed in 2022?

In 2022, the proportion of mobile sites with 5G services surpassed 90% of locations in major cities, marking a significant milestone. Moreover, the second carrier in the 2300 MHz band was introduced in Riyadh and Jeddah to provide greater capacity and better coverage. This year, the group set a new goal by embarking on its largest expansion.

Discover CST's Non-Terrestrial Networks (NTN) program, an initiative to integrate space and terrestrial networks for ubiquitous 5G/6G coverage across Saudi Arabia.

Low-band spectrum (700 MHz and 800 MHz) was awarded earlier for 4G, but operators can use it for 5G and the licences are technology neutral. The latter is necessary for ...
