The regulation, approved with the Resolution no. 174/2024 of the Capitoline Assembly establishes the ways in which Rome capital can make available photovoltaic solar ...

As the penetration of solar power increases, grid stability has become a critical issue. In response, Italy is prioritizing the development of grid-scale battery energy storage ...

The beneficiaries will be selected through a competitive, transparent, and non-discriminatory bidding process, where electricity storage developers will compete based on offers relating to ...

Italy's rolling hills dotted with solar farms and battery systems humming like well-trained opera singers. But behind this green energy harmony lies a strict conductor - the CEI 0 ...

The scheme is expected to accelerate Italy's and the EU's journey to a greener future by supporting the energy storage solutions needed for the continent's projected 80% ...

To meet such requirements, the storage facilities will have to be realized with a power in both absorption and release equal to at least 9 GW.

A spokesperson for the electricity transmission system operator (TSO) Terna has revealed huge interest in the energy storage-specific Centralized Allocation Mechanism for ...

Our study focuses on fine-tuning solar panel (PV) systems and battery storage (BESS) setups to address the energy needs of the Engineering Macro-area at the University of ...

The list of eligible electricity storage technologies will be revised every two years to reflect technological developments. Currently, eligible technologies include electrochemical lithium ...

New technical standards effective June 2025 will require all grid-scale solar farms to include at least 2 hours of on-site storage. Transmission operator Terna's piloting virtual power plants ...
