Qair and Vetiver Tech built 5.8 MW floating solar in Mahé The Seysun Lagoon project is the first utility-scale IPP in Seychelles and among the largest floating solar plants in Africa. It is backed ...

By deploying floating solar technology, the project makes use of lagoon surface area rather than scarce land, helping to overcome space constraints while unlocking new ...

By mid-2025, Seychelles is poised to take a significant leap in renewable energy with the launch of its first floating solar farm--the largest in Africa.

In a landmark move for renewable energy in the Indian Ocean, Qair International has officially commenced construction on the first floating solar power plant in the Seychelles.

As the first IPP utility-scale project in Seychelles and one of the largest floating solar PV projects in Africa, it represents a significant ...

This guide outlines the logistical framework for importing solar manufacturing materials to Seychelles. It covers sea and air freight considerations, customs procedures, and ...

French independent power producer (IPP) Qair has secured a US\$5.7 million senior debt facility to finance the development of a 5.8MW floating solar (FPV) project off Mahé ...

With photovoltaic (PV) systems now costing 80% less than a decade ago, solar + storage solutions are rewriting the rules. Let's explore how this tropical nation is cutting energy costs ...

As the first IPP utility-scale project in Seychelles and one of the largest floating solar PV projects in Africa, it represents a significant milestone for the region.

As a floating solar PV project, it also offers an innovative solution to the land constraints faced by island nations like Seychelles, unlocking clean energy generation without ...
