What does the Seychelles government do?

The Seychelles Government is committed to providing adequate, reliable and affordable energy to meet future energy consumption needs and to underpin strong economic growth through consumable energy initiatives. The Seychelles enjoy favourable conditions for renewable energy (RE) resources, such as wind and solar.

What is Seychelles' energy policy?

Energy policy calls for 15% renewables by 2030. In June 2013, the first wind farm in Seychelles was officially inaugurated. This 6 MW power plant can produce up to 2% of the Seychelles' power and is located on Mahé Island. It is expected that the wind farm will replace 1.6 million litres of diesel fuel annually.

How is electricity produced in Seychelles?

Electricity for the island nation of Seychelles is primarily produced by diesel generators which must import their fuel (69 MW on Mahe and 12 MW on Praslin). Energy policy calls for 15% renewables by 2030. In June 2013, the first wind farm in Seychelles was officially inaugurated.

Who funded the Seychelles wind farm project?

The wind farm project was fully funded by the Abu Dhabi government through a \$28 Million grant to the Seychelles. The Abu Dhabi government appointed Masdar as project manager. The wind farm was originally envisaged to be commissioned by November 2012 however this suffered several delays.

Local expertise has been built to manage and maintain off-grid energy installations, while remote monitoring technology ensures system performance can be assessed and ...

This 6 MW power plant can produce up to 2% of the Seychelles' power [2] and is located on Mahé Island. It is expected that the wind farm will ...

Distribution of wind potential Annual generation per unit of installed PV capacity (MWh/kWp) Wind power density at 100m height (W/m<sup>2</sup>)

The solar farm project complements the 6MWp Port Victoria Wind Farm, which was a donation from the UAE Government. With the amount of ...
