How many solar panels are in Monterrey?

Part of an \$18 million plant expansion investment, the newly installed solar panel array is the largest project of isolated battery-powered supply in Mexico. In total, close to 10,000 panels have been installed across Monterrey's three plants, with plans to be producing energy in 2024.

Why is battery storage important for solar power?

As solar power can only be produced during daylight hours, battery storage allows this energy to be saved for use during the night. During low-demand hours, solar power can be directed towards batteries rather than to the grid to provide power during peak hours of high demand.

Does Sunrun offer battery storage?

SUNRUN CUSTOMERS: Battery storage is now available for your current system! Available in select markets. Learn more. Make this season a little brighter--enjoy an effortless and affordable solar experience with the Sunrun Subscription Plan. With 1 million homes and counting, no one has more installation expertise.
