Included in the request are power purchase agreements (PPAs) from existing resources, as well as new, company-owned natural ...

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage ...

From coal plant conversions to solar co-location, Georgia Power's battery strategy highlights the evolving role of storage in utility-scale energy planning.

The Center of Innovation assists businesses focused on energy storage in two primary ways. We work closely with Georgia's universities to identify cutting-edge research regarding energy ...

Our Hickory Park project in the southwest of the State of Georgia is RWE's largest solar storage project in the US to date. The park is composed of an 40MW 2-hour battery energy storage ...

Georgia's solar and storage market has taken off in recent years, landing it a top spot in SEIA's national solar rankings. During the 2024 session, an industry-supported decommissioning bill ...

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in ...

Included in the request are power purchase agreements (PPAs) from existing resources, as well as new, company-owned natural gas generation, battery energy storage ...

The state has quietly become a hotspot for energy storage companies, blending Southern ingenuity with cutting-edge tech. Let's unpack why Georgia's storage scene ...

Georgia Power has applied for certification of four battery energy storage sites totaling 500 MW expected to come online in 2026.
