How much do solar panels cost in Iraq?

Although increasingly cost-effective, solar panel systems in Iraq still cost between 5 and 10 million Iraqi dinars, with the average 5-6 kilowatt system priced around 5 million dinars. Many users say they recoup the upfront cost within one-to-three years, and most systems come with a 15-year warranty.

Can solar panels help farmers irrigate in Iraq?

MOSUL, Aug 5 (Reuters) - Weary of paying big bills for power supplies that are often cut off, wheat grower Abdallah al-Ali is among the rising number of farmers to have turned to solar panels to keep their irrigation systems running during the searing heat of the Iraqi summer.

How much solar power will Iraq have in 2025?

The country has a plan to install 12 gigawatts of solar capacity by 2030, according to the ministry of electricity, which includes delivering a 1 GW solar plant for Basra this year. Peak summer demand in 2025, meanwhile, is expected to reach 55 GW, while supply stands at just 27 GW, according to estimates by Iraq's electricity minister in January.

Are middle- and low-income people buying solar panels?

Omar Abdul Kareem Shukr, who heads Sama al-Sharq Company, which sells solar panels, told Reuters that even middle- and low-income citizens are buying solar systems as government initiatives have been put in place to encourage solar panel use.
