What is the most efficient solar panel?

The most efficient solar panel available for homes today is Maxeon's 440-watt panel at 22.8% efficiency. Solar panel efficiency is the percentage of incoming sunlight that a single solar panel can convert into electricity. Maxeon, Qcells, Solarever USA, Canadian Solar, and REC currently offer the most efficient solar panels on EnergySage.

How efficient are solar panels?

While the most efficient solar panel for residential use sits at 22.8% efficiency, scientists have discovered a few technology advancements that have gotten solar panels to around 90% efficiency (but they convert sunlight to heat, not electricity) in a lab setting. This was first done in the early 2010s at the University of California in San Diego.

How efficient are solar panels in 2025?

Basically, the more efficient solar panels are, the more power they can generate. In 2025, it's standard for residential solar panels to be between 21% and 22% efficient - but many brands are reaching ratings in the 23% range. Here are the most efficient solar panels that are currently available in 2025: Is solar panel efficiency important?

Which residential solar panels have the highest efficiency ratings?

Our CNET experts have found the market's top performers with the highest efficiency ratings. The most efficient residential solar panel right now is the Maxeon 7, which dethroned the older Maxeon and Canadian Solar panels when it launched in February 2024.

Solar technology is constantly evolving, with solar panels becoming cheaper and more efficient than ever. Solar panel efficiency refers to how well solar panels can turn sunlight into usable ...

Multiple factors in solar cell design play roles in limiting a cell's ability to convert the sunlight it receives. Designing with these factors in mind is ...

Solar panel efficiency is the amount of sunlight (solar irradiance) that falls on the surface of a solar panel and is converted into electricity. Due to the many advances in ...

Our CNET experts have found the market's top performers with the highest efficiency ratings. The most

efficient residential solar panel right now is the Maxeon 7, which dethroned the...

Learn what solar panel efficiency means, why it matters in 2025, and how to choose the best panels for your home.

Our CNET experts have found the market's top performers with the highest efficiency ratings. The most efficient residential solar panel right now is ...

SunPower's Maxeon produces the most efficient solar panels in the industry, which consistently hit above 24% efficiency. Its latest Maxeon 7 panels are particularly ...

In this guide, I will review the top six most efficient solar panels brands in the clean energy industry you can install on your home and discuss how they compare to other ...

Here are the most efficient solar panels on the market, with all the analysis you need to pick the best model for your home.

The most efficient solar panel available for homes today is Maxeon's 440-watt panel at 22.8% efficiency. Solar panel efficiency is the percentage of incoming sunlight that a single ...
