As the penetration of solar power increases, grid stability has become a critical issue. In response, Italy is prioritizing the development of grid-scale battery energy storage ...

This study aimed to optimize Italy's electricity supply by leveraging a hybrid PV-wind energy system, employing advanced optimization techniques. The primary goal was ...

Italy awarded more than 1.1 gigawatts of capacity to 88 projects in its first auction exclusively for solar projects built without equipment manufactured in China, setting an ...

The global race for energy storage solutions has transformed into something resembling an Olympic sport - and these two nations are sprinting ahead with wildly different ...

The fact that Italy is deploying such high levels of storage using systems with an average of 9 kW and 13 kWh of capacity is remarkable, likely only equalled by a couple of ...

In conclusion, Italy's solar industry is on a trajectory of significant growth, underpinned by ambitious government targets and a burgeoning energy storage market.

On 13th November, CORNEX signed a strategic cooperation agreement with the Italian company Cestari Group in Wuhan, Hubei province.

The energy storage market in Italy saw a significant uptick in 2024, marked by a notable increase in stand-alone connections, a significant step towards the path of energy ...

In March 2023, the European Commission published a series of recommendations on policy actions to support greater deployment of electricity storage in the European Union.

As the penetration of solar power increases, grid stability has become a critical issue. In response, Italy is prioritizing the development ...
